

# Crossrail Custom House C520

## Google Cardboard Safety Environmental Appreciation

Custom House are using Google cardboard kit to show the environment where people would work from remote location. Google Cardboard is a fold-out cardboard smartphone mount that, when combined with lenses, a magnet, a piece of hook-and-loop fastener and a rubber band and held against the face, affords a virtual reality experience .A smartphone with stereoscopic display software fits into this device and the lenses allow a person to perceive the images as one single three-dimensional image.

### Learning Outcomes / Lessons Learnt

- Using Photosphere software a 180 to 360 degrees photo can be used and using Google cardboard a VR immersive environment can be created.
- The Photosphere images can be shown to designers/CDM coordinators to identify future developments where potential safety issues could be designed out

### Cost of Implementation & Selection of Equipment

- Google cardboard cost range = £20 to £40
- Smartphone with Google cardboard Software -Free

**Innovator Contact:** Ravintheran Kuganathan  
**Project:** Custom House C520

**Contact Details:** (Ravi) rkuganathan1@laingorourke.com (Tel: 07768024709)  
**Supplier\ Product used:** Google cardboard
