

1. BAM Rail Scotland are blazing a trail for Digital Construction and the benefits it brings to planning, cost effective, reduced hours, less people on ballast etc...
2. Digital Construction for HSQE benefits such as HAZID, HAZOP planning with virtual planning, up to date information and live feed.
3. Digital Construction for HSQE is not only key in GRIP 6 to 8, but for the early GRIP 3 to 5 stages, what particular areas of the early GRIP stages benefit HSQE.
4. Integration of the Digital Process for HSQE for Site induction/Geographical knowledge/Worksite Hazard could be viewed in a 360 Immersive environment is this part or the next stage of Digital Construction for HSQE.
5. The joint Bam Nuttall and NWR, Igloo showcase at Aberdeen Concourse demonstrated the amount of work undertaken and the success of the A2I Blockade of sections 1&2. Which brought significant praise from MSP,s/Executives from Chambers of Commerce/ Local Councillors and the general public, are you planning a further showcasing on the completion of Sections 3&4.
6. BAM presented Igloo (digital construction to Rail Contractors meeting), further request to present to IOSH Glasgow, Glasgow University with live current Project.
