

## Specification

The Mk III Easy Wedge has been manufactured from a plastic that has properties close to that of a metal but still retaining its lightweight features. The durability of the Mk III has been improved since its wooden version increasing its lifetime dramatically. Its gradient has been set to ensure ease of insertion into the plasterboards whilst also ensuring its portability. Its integrated grooved handles ensure the wedge can be handled easily and safely.

The wedge has a Patent Granted and is a European Community Registered Design, US Registered Design and Australia Registered Design.

*The Easy Wedge is a revolutionary design for the plaster supply trade. Its purpose is to split packs of plasterboards into the desired amount.*
