Ceramic tile landscape to podium area

Product - B-Eames Cutting Guide

We have a significant amount of porcelain tiles for paving the court yard as illustrated in this CGI. The porcelain tiles are cut to some intricate shapes. By the use of this innovative product we intend to pilot the product on this site. Our expectations are the project will benefit from the clean finish and accuracy by using the equipment. Our Group head of H&S Mr Barry Oliver, our Regional Directors and H&S team believe this is the future must have H&S product.

We are confident this provides some significant safety and occupational benefits.

The B _ Eames disc cutter below has the following benefits:

Cuts exact straight lines

Battery powered water bottle that plugs in so no need for the second operative when cutting

Reduces the amount of dust as always using water that is attached by a battery powered water bottle.

Precise measuring in half the time

No need to sweep the floor

Cut exact lines through water,mud,dust,stone etc

Possible to cut 50 meters plus without marking the floor

Pour water without washing your line away

No more direct eye to blade needed

Easy to see sight in dust

Stand correctly over the cutter(better on back)

Easy to fit and calibrate

Currently:-

Worldwide PCT covering 152 countries

UK and European patent approved and live

Product ready to go to manufacture in the UK, fabricators set up.

Positives

- No eye contact with the blade
- Reduces the inhalation of dust
- Battery powered water bottle attached so no need for second operative
- Better posture for occupational health and protection from debris contact.
- No excuse for not having running water
- Cuts through puddles, dirt etc., no line on the floor required.
