

Scaffold Gantry FACT SHEET!

- 1. Total length is over 60m – that's 3 double decker buses end to end!**

- 2. Maximum Load – 60,000KG – Equivalent of 750 people or 2 humpback whales!**

- 3. Over 2km of scaffold tubes have been used to construct this structure along with over 500 fixings! That is enough to reach from this point all the way to Vauxhall bridge!!**
- 4. The cabins were lifted on using a 400ton crane during the night to minimise disruption and reduce congestion to local area.**
