

**CONSIDERATE  
CONSTRUCTORS  
SCHEME**

**ABOUT THE CONSIDERATE  
CONSTRUCTORS SCHEME:**

What it means  
for you working  
on site

RAISING STANDARDS,  
BUILDING TRUST.

**CCSCHEME.ORG.UK**

## Construction activity registered with the Scheme is monitored for its performance in three areas:

### RESPECT THE COMMUNITY

Your workplace often causes disturbance to others, minimise this by working during agreed hours, ensuring noisy or dusty work is controlled correctly and that your dress and language cannot cause offence.

### CARE FOR THE ENVIRONMENT

Ensure that unused plant and equipment is turned off when not in use to minimise emissions, use materials carefully to avoid wastage and recycle waste materials where possible.

### VALUE THEIR WORKFORCE

Treat your colleagues with respect, take care of your wellbeing ensuring that you get sufficient sleep and eat well. Know where to get support with your wellbeing if required and support others to get support when they need it.

We have lots of free resources on our Best Practice Hub to help you at [ccsbestpractice.org.uk](https://ccsbestpractice.org.uk)

Our Public Support team are here for anyone who may have a concern or feedback about construction activity.

## REMEMBER:

**Your personal commitment and actions in respecting the community, caring for the environment and valuing your colleagues, will help to raise standards and build trust in the construction industry.**
